Additional upgrades and customisations are available on request and will be priced separately.

Council fees, consents, site preparation, specialist reports (geotech, surveyor), earthworks, utility connections, and landscaping/decking are excluded.

All prices exclude GST and are based on construction taking place in 30 km of our yard. Further On-site construction is available at an additional cost, which will vary depending on location and site access.

Hari Homes offers full support throughout the entire process — from site assessments and feasibility studies to geotechnical and engineering reports, council approvals (PIMs and building consents), and preparation of site-specific working drawings.

Start your home journey with us today.

We offer full customisation to suit your needs and lifestyle.
